ECONOMICAL TRANSLUCENT SKYLIGHTS & WALL SYSTEMS

CREATING ENVIRONMENTS WHERE PEOPLE CAN SHINE™

LightBasic™

TRANSLUCENT DAYLIGHTING SYSTEMS

WHEN YOUR BUDGET DEMANDS A DURABLE YET LOW COST DAYLIGHTING SOLUTION

LightBasic™ translucent panel wall systems and skylights from Major Industries are the perfect balance of simplicity and performance, delivering outstanding sun control at an economical price.

What makes LightBasic™ different from other translucent panel systems? LightBasic™ offers a simplified framing system and a durable fiberglass reinforced face sheet that's lightweight, easy to install and easy on the budget. It's a unique combination that's aimed at buyers who demand an economical translucent daylighting system that will hold up under a variety of conditions.

Perfectly suited for office spaces, school facilities, warehouses, manufacturing centers and other locations where glare-free light is instrumental to occupant performance and comfort, LightBasic™ translucent panel systems are a good fit for both new and retrofit construction and can be custom-designed to fit your specific needs and requirements. Contact our sales team today to find out more about LightBasic™ and our other daylighting system options.

LightBasic™ diffuses direct sunlight...

IMPROVE THE QUALITY OF YOUR ENVIRONMENT — BOTH INSIDE AND OUT

LightBasic™ systems are an energy-saving and cost-effective green design tool that provides occupants with the beauty and benefits of glare-free natural light. By reducing the need for energy-hungry artificial lighting (which can make up more than 25% of a commercial building's overall energy use) as well as controlling heat loss and gain, LightBasic™ can optimize energy performance and reduce HVAC loads. This is especially important during peak energy use hours when costs are at their highest.

Because of their environmentally-friendly design qualities, including post-consumer and pre-consumer recycled content and energy-saving insulation options, LightBasic™ systems may contribute to a variety of LEED® credits for both new construction and existing buildings.

For additional information on sustainable design and LEED® opportunities, visit us online at majorskylights.com.

FEATURES & BENEFITS

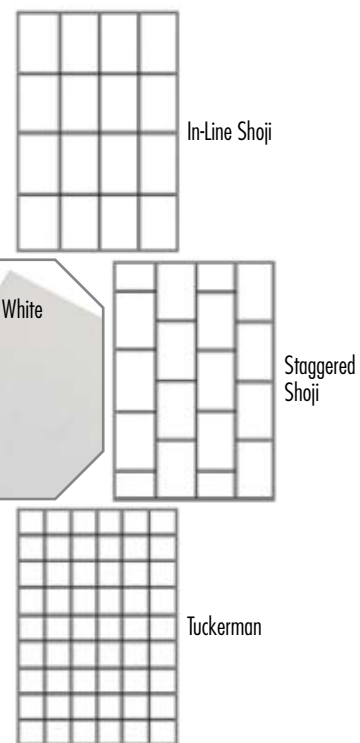

While LightBasic™ translucent panel systems are value-engineered, they're not short of features. Like all of our daylighting systems, they're engineered to perform in a wide range of conditions.

LightBasic™ SYSTEMS ALSO FEATURE:

- Cost-effective for new and retrofit applications - available in custom wall and pre-engineered skylight configurations
- Fiberglass reinforced face sheet for economy and durability
- Systems available in 2 3/4" thick panels, with panel sizes up to 5' x 20'
- Grid layout options include In-line Shoji, Staggered Shoji and Tuckerman patterns (shown at right)
- Two available translucent insulation options for enhanced thermal performance
- Two standard sheet colors available – White and Crystal
- 5 year color change and 10 year fiberbloom warranties standard
- Optional thermally broken framing for enhanced performance in severe climates
- Available with a full range of long-lasting AAMA 2604/2605 coatings and AAMA 603.8 anodizing colors to meet your aesthetic needs

GRID PATTERN OPTIONS

*Skylights available with In-line Shoji only.

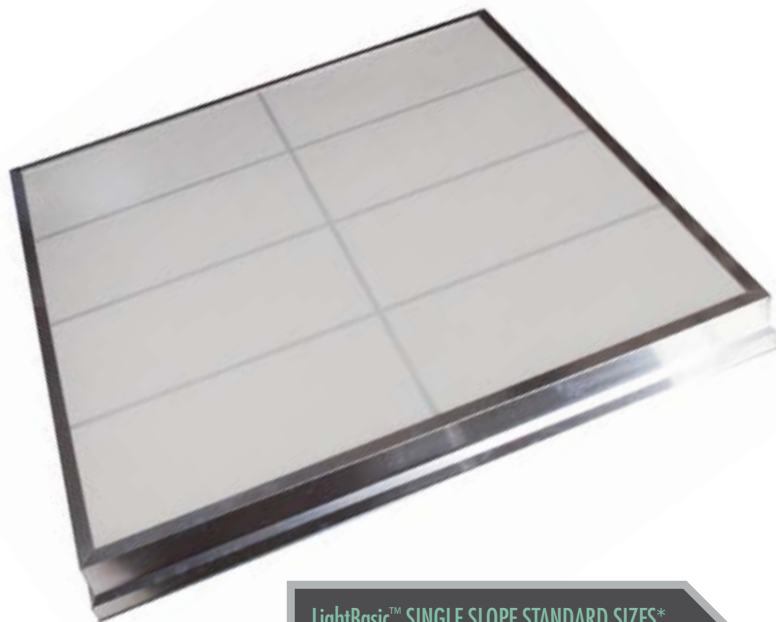

SHEET COLORS

Create a Unique Look with Nighttime Illumination

No special lighting necessary (though you can experiment all you want!). The night sky becomes the perfect backdrop for the soft, illuminated glow of a back-lit translucent panels. Add visual impact and highlight logos or signage.

LightBasic™ QUICK SHIP™ SKYLIGHTS

Shipped ready-to-install, LightBasic™ Quick Ship™ self-flashing single slope translucent skylights are a unique blend of performance and price that's aimed at budget-conscious buyers who demand an easy-to-install translucent panel skylight that will hold up to the elements.

LightBasic™ Quick Ship™ skylights are available in pre-engineered sizes from 4' x 4' to 5' x 20', and are available with insulation options for enhanced thermal performance. LightBasic™ Quick Ship™ single slope skylights are also self-flashing and ship pre-assembled.

If you're looking for a unique blend of glare-free light and thermal performance in an economical package, take a closer look at LightBasic™ Quick Ship™ single slope skylights.

FEATURES AND BENEFITS OF LightBasic™ QUICK SHIP™ SKYLIGHTS:

- 2.75" panel thickness with 12" x 24" In-Line Shoji grid pattern
- Fiberglass reinforced face sheet for light and UV control as well as durability
- Clear Anodized finish for dependability in any climate
- White or Crystal sheet color options - insulation options available for enhanced thermal performance
- Custom configurations available - contact Major for restrictions and details

ABOUT MAJOR INDUSTRIES, INC.

Major Industries engineers and manufactures custom skylights, canopies and translucent wall systems that fit your needs - and your budget. With four decades of experience, we know that architects, designers and owners are looking for tough, dependable and cost-effective daylighting systems, and we've created a wide range of systems to fit every need — all backed by industry-best warranties and an excellent on-time delivery record.

Your decision to use Major Industries is a sign of trust we take seriously, and we're committed to working with you to create the optimal daylighting solution for your next project. Our sales team will work with you to find a daylighting solution that's right for your next project, and our in-house structural engineering capabilities help you conquer your toughest design challenges. From light-controlling translucent panel systems that eliminate glare and block damaging UV to glass skylights and unique mixed glazed systems, we provide reliable daylighting solutions that let natural light in while keeping the elements out.

For more information about our full line of daylighting systems, [visit us online at majorskylights.com](http://majorskylights.com).
